## Prayer position routine

This weeks task is to find out about a ship called the *Golden Hind*. See if you can answer the questions below. Try and write in full sentences.

1. Who was the captain of the *Golden Hind*?
2. When was it built?
3. What is the *Golden Hind* famous for?
4. What was the *Golden Hind* first named?
5. What did Queen Elizabeth do with the *Golden Hind*?

You can watch the clip below and/or research on the Internet. There is also a some text where the answers can be found.

Happy fact finding.

<https://www.youtube.com/watch?v=qC0AGK6rLDA>

Now have a go at drawing the *Golden Hind*.

The *Golden Hind* was a large sailing ship whose captain was Sir Francis Drake. She was originally known by the name *Pelican* but was later renamed by her captain in the respect of his patron Sir Christopher Hatton. She was built in 1577. The *Golden Hind* or *Golden Hinde* is famous for sailing the world from 1577 through 1580 under the command of Sir Francis Drake. Sir Francis Drake headed the *Golden Hind* into the Plymouth Harbour on September 26, 1580. Upon his arrival Queen Elizabeth I made the sea captain a knight aboard the *Golden Hind*. In thanks, Sir Francis Drake gave the Queen nearly 160,000 pesos, with which she paid off her foreign debt. Once Drake completed his voyage, the Queen made the *Golden Hind* stay in Deptford as a public exhibit for all to see and visit for near on a hundred years until it began to rot. Nowadays the *Golden Hind* that you see In London is a replica.

## Well-being Wednesday

Please choose one of the creative activities below for your child to complete this afternoon. There is no expectation that this work is to be sent in. It is an opportunity for your child to be away from the computer and to complete some creative learning.

- Make your own golden coins! Get your parents to hide them around your house and give you clues so you can find your very own treasure,
- Create a treasure map. Why not get a tea bag and stain the paper so it looks old?
- Create your own pirate ship out of your recycling! Can you give your boat a sail (maybe an old pair of socks)?
- Make your own pirate hat. You can decorate it how you would like. You might want to draw the Jolly Roger on it.
- Play pirates outside. Pretend that an enemy ship is approaching and you and your crew have to fight off the pirates!
- Make a pirate ship out of Lego.

## Science resources

### Adaptations-

Living things are adapted to their habitats. This means that they have special features that help them to survive.

- An African elephant, for example, lives in a hot habitat and has very large ears that it flaps to keep cool.
- A polar bear, on the other hand, lives in a cold habitat and has thick fur to keep warm.
- It's not just animals that are adapted to their environment, plants are too.
- A cactus is well adapted for survival in the desert. They have long roots to collect water from a large area and a stem that can store water for a long period of time.
- The animals and plants in one habitat are suited to live there and may not be able to survive in other habitats. When a habitat changes, the animals and plants that live there are affected.

Female kangaroos have a special pouch to make sure their offspring is born safely, and has to best chance of survival.

They have Large ears to detect danger.
